

***Eriogonum tiehmii* Reveal (1985)****TIEHM BUCKWHEAT**

**FAMILY:** *Polygonaceae*, the buckwheat family.

**STATUS:**

USFWS/ESA: species of concern. STATE OF NEVADA: none. BLM: Special Status Species. USFS: none.  
NNPNS: THREATENED.

Heritage Program SENSITIVE LIST, ranks: G1 S1

**POPULATION CENSUS:** 2 occurrences mapped at 1.0 km (0.6 mi) separation, OR 6 occurrences mapped at 0.16 km (0.1 mi) separation; total estimated individuals 21,000+, total estimated area 8.5 ha (21.0 ac). **TREND:** unknown.

**IMPACTS AND MAJOR THREATS:** Off-road vehicle use, mineral exploration and development, small population numbers and areas. Most sites have been impacted by past mineral exploration and extraction, and claims markers remain.

**INVENTORY EFFORT:** Surveys appear to be complete, with little or no unexamined potential habitat remaining. Most recent entered survey 1994, average year of last survey 1994. **Years since last entered survey** (percent of mapped records at various survey ages): **6-10 yrs:** 100%.

**LAND MANAGEMENT:** U. S. Bureau of Land Management.

**RANGE:** Esmeralda County, Nevada. Endemic to a very small area of the Silver Peak Range. Maximum range dimension 1.6 km (1.0 mi) excluding most disjunct record. **Type specimen** collected in Esmeralda County.

**ELEVATIONS RECORDED:** 5960-6200 feet (1817-1890 meters).

**HABITAT:** Dry, open, relatively barren, light-colored rocky clay soils derived from a formation of interbedded claystones, shales, tuffaceous sandstones, and limestones, on all aspects with slopes up to about 50 percent, in pure stands or with a sparse cover of *Atriplex confertifolia*, *Pleuraphis jamesii*, *Sporobolus airoides*, and a few other species.

**PHENOLOGY:** flowering late-spring. Range of most frequent **survey months:** May.

**LIFE-FORM AND HABIT:** long-lived perennial cushion.

**DESCRIPTION:** A low, spreading, perennial herb that forms a dense mat up to 3 dm across. Clusters of cream-colored flowers bloom May-July.

**PHOTOGRAPHS:** Morefield (1995); Nevada Natural Heritage Program slide collection (1986-present) and files.

**ILLUSTRATIONS:** none known.

**OTHER GENERAL REFERENCES** (listed separately): Reveal (1985).

# NEVADA RARE PLANT ATLAS

**INDEX TO MAPS AND FACT SHEETS**  
(8 August 2001)

This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, whether or not included in the current Nevada Rare Plant Atlas. Atlas fact sheets and maps are available and linked for over 80% of these taxa. PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections for further information on the sources and limitations of the data represented on the maps and fact sheets, and for general references cited only in brief in the fact sheets. Fact sheets are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. Images, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. Updated maps and fact sheets will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.

**Map Printing and Display:** Due to storage limitations, the map images linked to this web page are **not** reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the first image that displays is **formatted for best printing results, even though the screen display may appear degraded.** To best approximate an original printed version: change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then **print pages 1 to 1** of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its **best display quality on your screen**, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.
